Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Inoue et al (US 6,226,449).

Regarding claim 1, Inoue discloses an image reproducing apparatus comprising:

an attacher (removable harddisk drive 415; Fig. 4; col. 4, lines 1-9) to be attached with a recording medium forming a plurality of folders (i.e., 1, 2, 3...) for managing a plurality of image files (see Fig. 6 for a plurality of classified folders);

a folder detector for detecting folder numbers (i.e., folder No. 1, 2, 3..) of the plurality of folders; a folder number displayer for displaying the folder numbers detected by the folder number detector (see Fig. 6, col. 6, line 54 – col. 7, line 48, wherein a folder detector is inherent to detect the folder numbers in order for the system to function as disclosed);

a selector (i.e., 305a-d) for selecting any one of the folder numbers displayed by the folder number displayer (Fig. 3; col. 7, lines 26-54); a file number detector for detecting the

Art Unit: 2615

number of image files (i.e., 10 image files as shown in Fig. 6 & details in Fig. 7) managed by the folder holding the folder number selected by the selector; and a file number displayer for displaying the number of image files detected by the file detected by the file number detector (also see Figs. 6 & 7).

Regarding claim 2, it is clearly shown in Figs. 6 & 7 that the file number displayer displays the file number on the same screen as a screen displaying the folder numbers.

Regarding claim 3, also disclosed is a total file number detector for detecting a total number of image files (i.e., 173 image files shown in Fig. 6) recorded in the recording medium and a total file number displayer for displaying the total file number detected by the total file number detector (see Fig. 6, and note that a total file **detector** is inherent in order for the system to function as disclosed).

Regarding claim 4, it is also clear that the total file number displayer displays the total number on the same screen as the screen displaying the folder numbers (Figs. 6 & 7).
